

### **LIQUID DEMOCRACY**

Citizens must vote on all issues or each time delegate their voice to another person to do it for them.

### **CORPORATE INFLUENCE**

All local reforms must be digitally submitted, and digitally signed by endorsing citizens.

### **CORPORATE LAW**

Corporations can no longer be directly pursued in civil law suits by citizens. They can only be taken to court by the government.

### **DATA STORAGE**

All data is stored on the servers of digital companies and citizens do not have access to it.

### **UNIVERSAL TAX ON MICROPRENEURS**

Universal Tax on micropreneur network to pay for “privatized” digital infrastructure.

### **NATIONAL GOVERNMENT**

Public health insurance covers only costs of up to 100EUR per family per year.

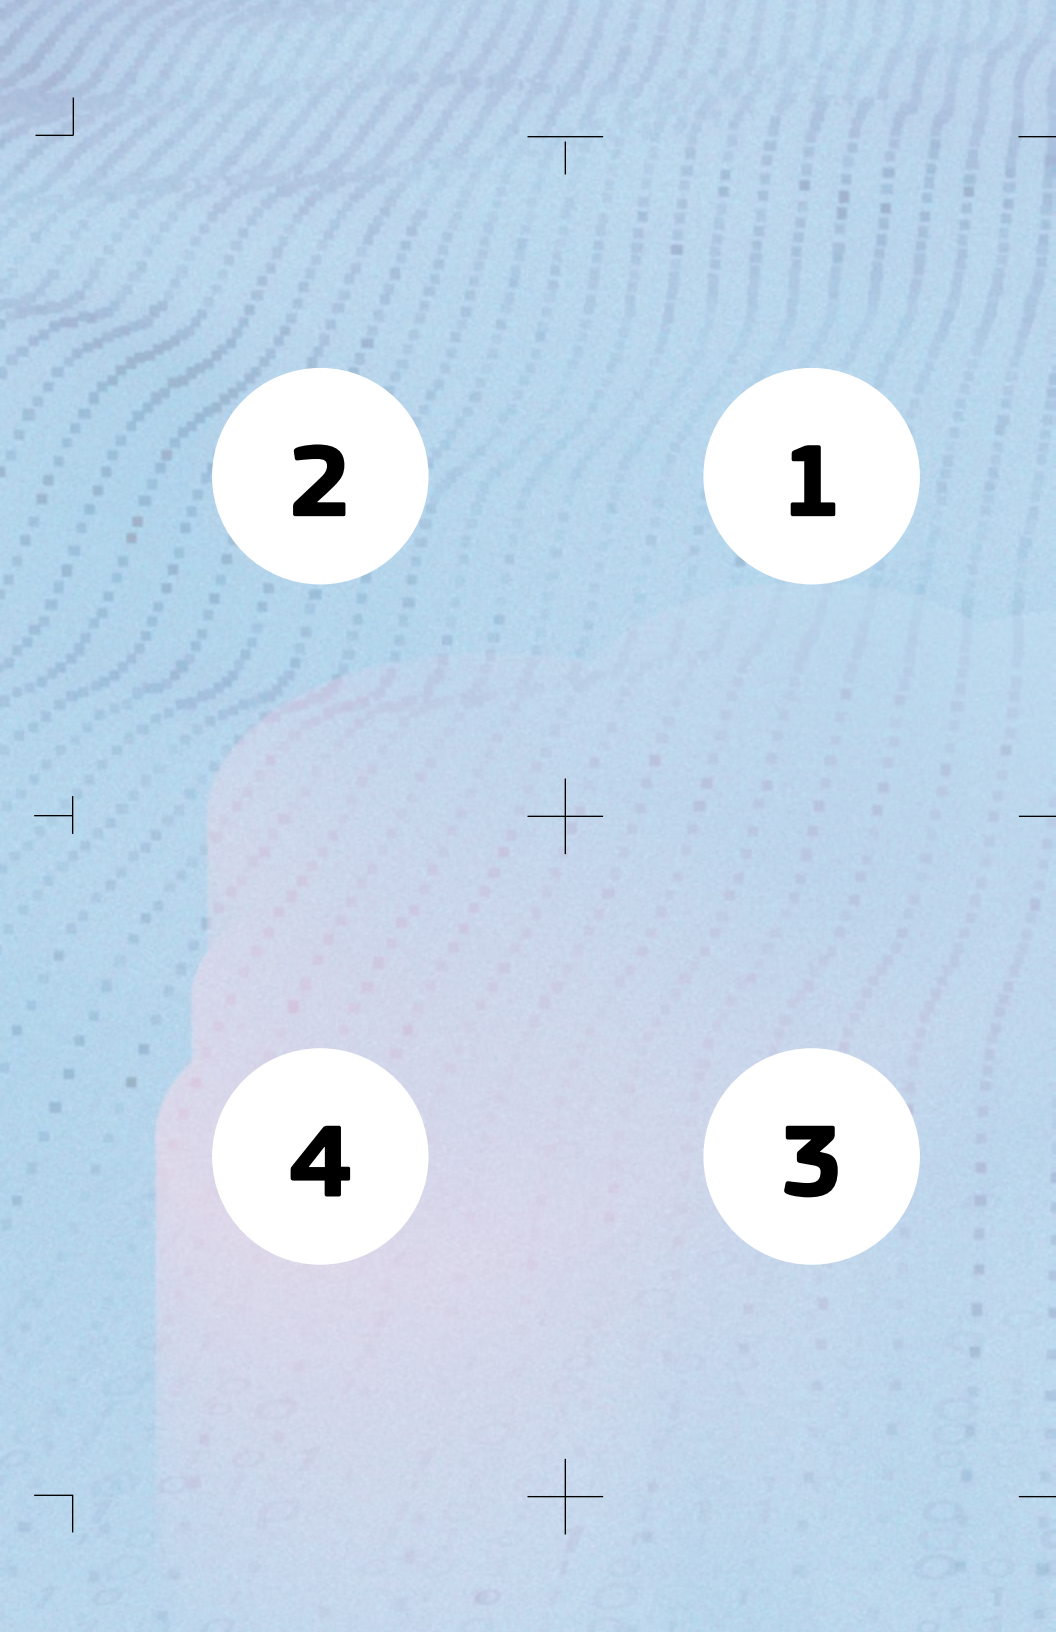

### **MONITORING FREEDOMS**

Any working age citizen is allowed to turn off all monitoring capabilities on their devices for up to 6 hours per day.

### **DIGITAL ID**

All persons must possess digital identity, otherwise they will be arrested and incarcerated.

## BALANCED INFORMATION

To provide better security, supra-national governing bodies will store anonymized records of digital transactions (content, assets, and discussions).

## GOVERNANCE TECHNOLOGIES

All governance algorithms must now be submitted to an independent assessment body to ensure they are designed without embedded biases.

## BEHAVIOUR ADAPTATION

The Lag clause allows citizens one year to adapt behaviour to any changes in legislation, without fine. Citizens are warned of infractions, but neither their income nor their records are penalized.

## MANDATORY VOTING

Mandatory participation laws have been considered - forcing all able bodied adults between the age of 13-80 to participate in at least one vote per year. Failure to do so can result in mandatory civic education or limitation of services.

## DIGITAL PARTICIPATION

All persons must possess digital identity, otherwise they will be flagged and members of the community alerted of the need for interventions.

## HYPERCONNECTIVITY

Every citizen is obliged to engage in politics for at least half a day per week. Respective training will be provided and loss of working hours refunded.

## DATA TAX

Citizen Data taxes will be applied to all companies, forcing them to pay individuals for the use of their data. This payment is in addition to the taxes already collected by the state.

## DATA SHARING

Citizens can select when and how to share their information across government controlled systems. Currently this is a government controlled decision.
